DETAILED ACTION

Remarks

1. In response to communications filed on December 7, 2006, no claims have been cancelled; no claims have been amended, and no new claims have been added.

Therefore, claims 1-38 are still presently pending in the application.

2. In view of the Appeal Brief filed on December 7, 2006, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2164

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 11, 21, 23, 25 and 32, call for a "file", but not a "file system". Since there is no "file system" defined within the independent claims, which makes it unclear as to what a "non-file system structures" should be or are within the claim language.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-38 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. Claims 1, 11, 21, 23 and 32 disclose the step of "initializing a file to store a web based application". This suggests that a "web based application" is initially stored in the file. The second step refers to "non-file system structures of the web based application". If the file is part of the file system, which is reasonable assumption, then the web based application cannot define any non-file system structures because it is stored within the file system. The second step cannot be preformed if the first step is preformed, making the claimed invention inoperable as claimed.

Response to Arguments

6. Applicant's arguments filed on December 7, 2006, with respect to the rejected claims in view of the cited references have been considered but are moot in view of the new ground(s) of rejection.
